

This dataset is a compilation of data collected over 40 years, and the sampling methods, sampling gears, survey design and survey coverage has changed during these years. To avoid misunderstandings, we have password protected the data and you will need to contact IMR to get a password to unlock. We will also put you in contact with researchers at IMR that can advice you in the usage of this dataset.

Please send an email to datahjelp@hi.no to get a password to unlock the data.
